COURSE**

AUG. 7-9, 2018

Western Michigan University,

a leader in the field of paper coating research and applications as well as a leading provider of undergraduate and graduate engineers and scientists, is offering its fiber recycling course.

Early bird registration \$1200

Received on or before June 15.

WMU has certified hundreds of products as repulpable and recyclable using industry agreed upon protocols. This course is an exciting, new offering from WMU that will bring together many industry and technology leaders as guest speakers to seriously upgrade your fiber recycling knowledge.

Learning Objectives

Individuals taking this course should leave with the following understanding:

- Recycled Fiber market trends and outlook — local and global
- Fiber recovery and properties/usage by grade
- Unit operations for contaminant removal and recycled stock preparation
 - Pulping
 - Screening
 - Cleaning
- Installation and troubleshooting
- An in-depth look at WMU's repulpability and recyclability protocols
- Stickies characterization and elimination strategies
- Drying of coated paper and paperboard and impacts on quality
- Waste paper collection (MRF) trends and equipment
- Sustainability — who/what is driving? What is the goal?
- Paper mill leaders roundtable
- Recyclable barrier coatings outlook
- Latest technology in recycled fiber chemistry
